

SLEEPLIGHT

SLEEPWELL WITH PERSONALIZED DUSK AND DAWN

PROBLEM

Our modern lifestyle often prevents us from receiving natural cues that aid in a healthy sleep cycle.

It is difficult to manage circadian rhythms and many times we are forced to sleep in unfamiliar environments or faced with negative stimuli.

SleepLight is a comfortable and lightweight smart sleep mask that blocks out unwanted light and provides its own-colored hues to trigger your body's natural responses (serum melatonin). Blue hues are used to wake you gently and effectively in the morning before your chosen alarm time, and red-toned light helps you fall asleep at night. These are the same light cues used by NASA to regulate sleep on the space station and customize your body's circadian rhythm.

SOLUTION

POTENTIAL MARKET

In 2019, the Market Size for Smart Sleep Devices was \$15.590 Billion

Compounded Annual Growth Rate (CAGR) is expected a rate of 18.5%

By the end of 2026, the market size is expected to reach \$43.470 Billion

Most of the market share is in North America with over 55% of the market

According to research by MarketWatch and Nester Research

TRACTION

HealthTech 2021

WINNER

Inpatient Health

SleepLight was formed during HackGT HealthTech Hackathon and Won Best Inpatient.

The prototype has been created and successfully tested, we also have published a demo and are working on a marketable prototype with lowered costs.

TEAM

Aditya Singhal: GT CS Student with drive and motivation, Many Hackathon Victories and Strong Code and Product Development Skills. Internship Experience at High Growth Tech Companies and Incoming at FAANG.

Laith Qushair: Auburn EE Student, Many Hackathon Victories and Hardware Engineering background in Product Development. Has Professional experience with building tangible electronics with hardware and software.

COMPETITION

Pegasi	Active Performance Sleep Glasses	Product is not suitable for average use (\$\$\$) and is not wearable while sleeping
Manta	Sleep Mask	Focused on temperature adjustment and no software compatibility to regulate sleep
Award Winning Sleep Mask	Red Light Sleep Mask	Only uses red LEDs and has no ability to customize sleep schedule or interact with software.

Our competitors in this Category have small market share and primarily pursue smart glass-based/non-customizable products for one size fits all solution wear and lack brand awareness.

SleepLight is customizable solution that uses software to allow users to customize their sleep schedules and/or load pre-written patterns to their liking. In addition, the design is modular in nature allowing for addition of custom noises and integrations with other IoT devices – a competitive edge that is not available in the marketplace.

PRODUCT

[HTTPS://DEVPOST.COM/SOFTWARE/SLEEPLIGHT](https://devpost.com/software/sleelight)

Hardware Based Product with Software Packaged In Form of Web and Mobile App interface.

Potential for Software Based licensing Model

Potential for Recurring Revenue with Software as a Service (SaaS) Model

Potential for SleepLight Marketplace to provide custom SleepLight Patterns

- This Gives Our Product A Competitive Edge as we can Provide Cloud Updates and Tailor to specific sleep patterns instead of a One-Size-Fits all approach of competitors

Modular Build Allowing for Easy supplemental audio and sensory sleep aids

- IOT Landscape Connection Possible

Cost Effective Build at Scale = Large Sales Margins for Hardware

- A baseline product with ESP32 Chips and IoT Wi-Fi capabilities will cost 7.50 at scale and 11.50 for lower volume.

Software Margins at 95%+ for SaaS Model

- Based on Market Research subscription revenue will be priced at \$1.99-3.99 monthly or discounted \$19.99-39.99 for 1-year.
- Software only has upfront development costs and will continue to generate revenue.

SleepWell with personalized dusk and dawn

SleepLight

The logo features a central light blue circle with the text "SleepLight" in a dark blue, sans-serif font. Surrounding this circle are eight light blue triangles, each with a thin dark blue outline, arranged in a circular pattern. The entire logo is set against a solid blue background.
